SYED FIRAS PEERZADA

Full-Stack Developer — Frontend & Mobile

Bhatkal, Karnataka, India | workwithfiras@gmail.com | linkedin.com/in/syedfiras7 | github.com/syedfiras | syedfiras.dev

PROFESSIONAL SUMMARY

Full-stack developer and CS undergraduate (B.Tech, expected 2028) with hands-on experience shipping production features across two startup internships, a completed SDE internship, and freelance client work. Builds end-to-end across React, React Native, Next.js, Angular/Ionic, Node.js, and Supabase — including a live production platform, a school management system, an AI-matching tool, and a paid client gym-management app. Fast learner who ships quickly in small, high-velocity teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS

Frontend: React.js, Next.js, Angular, Ionic, Tailwind CSS, NativeWind, Vite

Mobile: React Native, Expo, iOS/Android

Backend & Database: Node.js, Express, Supabase (PostgreSQL, Auth, Realtime)

Tools & Platforms: Git, VS Code, Vercel, Netlify, Render, WebSockets

EXPERIENCE

SDE Intern — *Dream Space Interiors, Bangalore* Jul 2026 – Oct 2026

- Built and shipped Interiora Studio, a production interior design management platform combining authentication, project management, and a responsive Tailwind CSS interface, deployed on Vercel.
- Extended platform features and internal tooling used by the design team through the end of the internship.

Frontend Developer — *OMNIMATE AI* May 2026 – Jul 2026

- Built frontend features for an AI-powered platform matching students with relevant internships.
- Implemented UI for AI-driven recommendation flows, iterating quickly with a small team on product feedback.

Frontend Developer — *Digiscrypt Technologies* Apr 2025 – Jul 2025

- Built core modules of a school management system handling student records, attendance, and administrative workflows.
- Translated product requirements into responsive, production-ready UI components in direct collaboration with the product and engineering team.
- Debugged, optimized, and shipped features across the frontend stack under real release timelines.

Freelance Developer — *Independent Client Work* Ongoing

- Designed and built a gym management app end-to-end for a paying client — member tracking, scheduling, and an admin dashboard — using Ionic, Angular, Node.js, and Supabase.
- Owned the project as sole developer from requirements gathering through deployment, managing a live client relationship and production data.

PROJECTS

Interiora Studio | *React, JavaScript, Tailwind CSS, Vercel* | Live Demo

- Full-stack interior design management platform with authentication, project management, and a polished, production-ready UI.

GymNet Solutions Portal | *Ionic, Angular, Node.js, Supabase* | Live Demo

- Gym management platform with member tracking, automated PDF invoice generation, an interactive class scheduler, and trainer planning tools backed by a real-time Supabase database.

IJESTM Journal Platform | *Next.js, TypeScript* | Live Demo

- Academic journal platform for AITM with advanced SEO for publication discoverability, built with Next.js and TypeScript.

EDUCATION

B.Tech. Computer Science — Expected 2028

CERTIFICATIONS & ACHIEVEMENTS

- Full-Stack Web Development Certification — IIT Hyderabad (2025); React, Node.js, Supabase.
- AIFF Certified Referee — Certified by the All India Football Federation.
- 4× State-Level Football Player — represented at state level across four tournaments.
- Built and shipped end-to-end prototypes at 13 national hackathons under tight deadlines in cross-functional teams.
